

**CITY OF OLYMPIA
REQUEST FOR QUALIFICATIONS (RFQ)
ENGINEERING CONSULTING SERVICES
FOR DESIGN OF THE MCALLISTER WELLFIELD**

The City of Olympia, Public Works Department, is seeking a qualified engineering firm to provide engineering services for development and construction of a new groundwater source, the McAllister Wellfield. Work includes drilling up to three wells, conducting pumping tests of the new wells and two existing wells, conducting geotechnical and hydrogeological work, and completing structural, electrical, and mechanical design of the well buildings and motor control center. Also included, is design and construction of a chlorination facility, backup generator, corrosion control (pH adjustment by aeration) and water quality analysis.

The full RFQ can be viewed on the Builders Exchange website, under Goods and Services, at BXWA.com.
